

# Maryland HIV Progress Report

## Data Reported through June 30, 2021

### Purpose: Monitoring our Progress

On July 20, 2015, the White House released the updated [National HIV/AIDS Strategy for the United States](#) (NHAS) in an effort to re-focus the response to the HIV epidemic in the U.S. NHAS summarizes a set of priorities and strategic action steps with measurable goals to be achieved by 2020. This report aims to provide a summary of Maryland's progress in accomplishing the NHAS 2020 goals. This report uses state and national surveillance data to evaluate the annual progress of 1) reducing new HIV infections, 2) increasing access to care and improving health outcomes, and 3) reducing HIV-related health disparities. Yearly evaluations improve inter-agency coordination, encourage progress, and ultimately enhance health outcomes in Maryland.
